

S3 CONFERENCE 2017

ASIA'S FIRST COLLABORATIVE SIMULATION CONFERENCE

31 October - 4 November 2017 | Academia, Singapore

PRE-CONFERENCE WORKSHOP

IMPLEMENTING AN INTERPROFESSIONAL *IN SITU* PROTECTED CODE BLUE RESUSCITATION SIMULATION PROGRAMME

31 October 2017 | Tuesday | 0830 – 1630 | Academia, Level 2

ABOUT THE WORKSHOP

Effectively managing the deteriorating patient with deadly airborne respiratory disease presents a challenge to the healthcare team. There are currently no clear policies on performing effective resuscitation for such patients without compromising the safety of the healthcare team. This workshop aims to equip simulation educators with the tools to plan, design and implement an inter-professional *in situ* simulation training for managing such patients.

The workshop focuses on sharing, discussions and active participation through the use of simulation. It aims to enable participants to determine if their organisation are in need of such training and if so, to be able to implement an inter-professional, *in situ* training simulation program for patient and staff safety.

LEARNING OBJECTIVES

At the end of the workshop, participants will be able to:

- To describe the challenges faced by the healthcare team in performing effective inter-professional resuscitation of a patient with deadly airborne respiratory disease
- To plan and perform needs assessment of the inter-professional team in managing such patients using a protected code blue resuscitation protocol
- To implement an inter-professional *in situ* simulation training program for managing such patients

PROGRAMME DIRECTOR & FACULTY

Dr Jansen Koh

Consultant, Department of Respiratory Medicine

Dr Roshni Sadashiv Gohkale

Consultant, Department of Internal Medicine

NC Mashithah Binte Mansor

Nursing Clinician, Medical Emergency Team

NC Suraya Abdullah

Nurse Clinician, Ward 17

SN Ameera Sapiee

Staff Nurse, Ward 17

Ms Leylane Anselmo

Respiratory Therapist, Intensive Care Unit

Ms Nurul Hadainah Binte Muhamad Suhaimi

Simulation Technologist, Changi Simulation Institute

TARGET AUDIENCE

Any healthcare worker or medical educator who has an interest in inter-professional and *in situ* simulation training.

FEES

SGD267.50 (inclusive of GST)

For participants attending the S3 Conference 2017
